

IMPRESA™

artistry ✿ technology ✿ craftsmanship

A joint venture between
Conestoga Wood Specialties Corporation
and La Venus S.p.A. of Italy.

The *Imprèsa* story

begins with Conestoga's well-known commitment to quality and reliability, and a desire to provide customers with an affordable, high quality alternative to wood. The solution was found in laminated veneers, a product group firmly established in Europe and typically sourced from Italy.

For over 40 years, Conestoga has built a reputation on delivering high quality cabinet doors and components. This commitment is seen in their world class finishing processes and their industry leading record of complete and on time delivery.

Conestoga's high standards for quality and service led them to seek a long term, secure relationship with an Italian partner who shared the same high level of commitment to its customers.

The Best of Both Worlds

Conestoga discovered the perfect match in La Venus S.p.A. of Pordenone, Italy. Both companies share the same high quality product and service standards and importantly, the same commitment to reliability. Together they made the decision to fully commit to the manufacturing of this collection of doors, accessories and components by creating a legal joint venture, and *Imprèsa* Technologies, LLC was born.

Italian Impression Technology™

The new venture, *Imprèsa* Technologies, utilizes a proprietary process — Italian Impression Technology — to expertly match the laminated veneers and wood product finishes to popular melamines. Carefully matching the grain, color and patina, *Imprèsa* offers a palette of products for designers and manufacturers to design and build complete custom kitchens one at a time.

Imprèsa Brand Products

Imprèsa brand products feature stylish, mitered five-piece doors and matching drawer fronts, offering creativity and design-flexibility for the budget conscious designer with discriminating taste.

Imprèsa delivers product quality, visual attractiveness and the ability to mix and match doors, accessories and components at an affordable price.

Lead-times

Upcharges and Limitations

Lead-times <i>(number of working days)</i>			
	Standard	Code Red	Code Blue
Doors and drawer fronts	7	3	5
Ancillary products	4	2	N/A

Lead-time information for matching solid wood products can be found in the lead-time section of the Conestoga Custom Product Manual.

Proven Durability

Decorative Laminate Veneer (DLV) products have been tested and certified by the Kitchen Cabinet Manufacturing Association.

- **Heat Resistance:** Imprèsa DLV products have been subjected to heat over 200° and showed no evidence of delamination.
- **Humidity Resistance:** Because the substraigh used to make DLV doors is a man-made material, it is far more stable than solid wood doors and will not expand or contract to the same extent. While ideal for high humidity conditions, Imprèsa products should be used in environmentally controlled climates and should not be exposed to high levels of moisture for prolonged periods. DLV products should never be used for exterior applications.
- **Ultra Violet Exposure:** Imprèsa DLV materials are not susceptible to color changes typically associated with UV exposure. Under normal lighting conditions DLV products will change very little in color or tone.

Product Care

DLV products can be cleaned using a mild non-abrasive detergent and damp sponge or cloth. Never saturate DLV products with water or other liquids.

Solid Wood and DLV Color Match

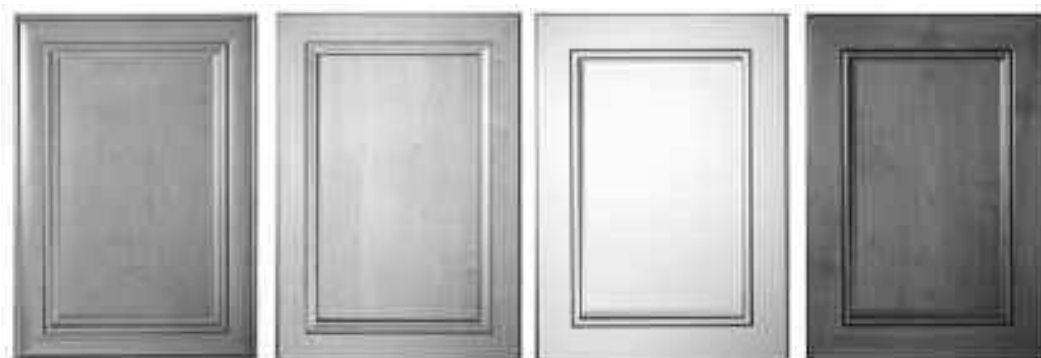

Solid wood products can be finished to closely resemble the Imprèsa DLV colors; however, recommended solid wood finishes may not be an exact match to Imprèsa DLV colors.

DLV products will change very little in color over time; however, due to the affects of light and natural aging, solid wood products will change in color. Finished solid wood and DLV products that are close in color initially may become less similar in color as they age.

Warranty Information

Imprèsa Technologies LLC, warrants that, for a period of one year from date of shipment, our products will be reasonably free of defects in materials and workmanship. When properly handled, Imprèsa products will conform, within acceptable tolerances, to applicable manufacturing specifications. This limited warranty applies only to Imprèsa products which are stored, handled, and installed in the manner consistent with Conestoga's wood components. Imprèsa Technologies will not be responsible or liable for any indirect, consequential or incidental damages or costs sustained by the user.
